

FOR A FASTER AND EFFECTIVE RECOVERY

TRI-BALL®

THE NEW RESPIRATORY EXERCISER

HANDY

The respiratory exerciser **TRI-BALL®** helps the patient to recover the normal respiration after a chest or abdominal surgery.

It has incorporated a visible label which allows to fastly identify the patient whom owns the set.

ECONOMICAL

As it is a small-size product, it allows, without altering its function, to save maintenance and storage costs.

HYGIENIC

Differing from others respiratory exercisers, **TRI-BALL®** incorporates a container to place the mouthpiece after being washed. This container has a lower overture to drain the spared cleaning water drops. In this way, we get a total protection of the mouthpiece after using the exerciser.
